

Pharmacy Data Is Constantly Changing

Accurate, reliable and timely pharmacy data information is vital to a payer's everyday business including maintaining accurate pharmacy directories, claims processing, compliance and fraud detection.

Pharmacy information changes continually. Our research shows an average of 25% of pharmacies make data changes each month.

Pharmacies consistently update their NCPDP Pharmacy Profile to ensure accurate and timely processing and payment of electronic pharmacy claims.

dataQ® is your only data source that captures these tens of thousands of pharmacy profile data changes and provides this up-to-date and in-depth pharmacy information in easy-to-integrate files.

Pharmacy Information You Need

CMS requires Part D plans to maintain pharmacy networks that are sufficient to ensure access to Medicare beneficiaries including retail, home infusion, and long-term care pharmacies. dataQ® contains the Pharmacy Service Type Code as reported by each of the 80,000+ pharmacy records including non-pharmacy prescription drug dispensers (NPDS) such as urgent and emergency care facilities, dispensing, physician practices, etc.

Other data included in dataQ® includes:

- Physical and mailing addresses, phone and fax numbers
- National Provider Identifier (NPI) number
- Parent organization and other relationship information
- Fraud, Waste & Abuse (FWA) Training Attestation
- Remittance information
- Specialty class, such as compounding or specialty pharmacy, community pharmacy, mail-order pharmacy, durable medical equipment, etc.
- Hours of operation
- Languages spoken
